

OFFICIAL REPORT #103
PREPARED BY MR. EDUQUE

DATE: 28/11/2123

During the construction of a sewer in [REDACTED], our team uncovered an unexpected find - an unusual case buried underground. This case contained a collection of artifacts, including a paper with undeciphered codes and old photos of the site dated almost 100 years ago. Our initial assessment suggests a potential connection to the Sectioned Chimaera Inspection.

Attached to this report are the images and documents related to the discovery for your perusal.

Thank you for your attention to this matter. We will keep you updated on the progress of our analysis and any significant developments.

Issued by: _____

A handwritten signature in dark ink, appearing to be 'Jmf', written over a horizontal line.
